

9 Qualities to Look for When Selecting a Cloud MSP

Cloud is evolving quickly, challenging companies to cope. A Cloud MSP can help. But how to select the right one?

An effective Cloud MSP has the following eight qualities:

Quality 1

Deep expertise across all delivery models

Quality 2

Proven experience with multivendor, multicloud environs

Quality 3

Strong relationships with leading cloud providers (AWS, Azure, GCP)

Quality 4

Broad portfolio of managed services to preserve future flexibility

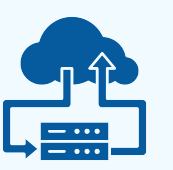

Quality 5

Technology foresight to deliver innovative cloud solutions

Quality 6

Commitment to performance-based SLAs

Quality 7

Well-aligned with industry best practices

Quality 8

Local language support to help address local regulatory, legal needs

Quality 9

Global reach to manage operations in multiple countries

Your search for the right **MSP** ends at **Veritis**.
